FED-STD 809E: Drilling & Repair

Become a professionally and properly trained technician, in accordance with Federal Standard 809E, with QSecurity's NEW 3-day Fed-Std 809E: Drilling and Repair class.

Who Should Attend:

Those interested in learning how to drill and repair GSA containers and vault doors.

Pre-requisite: U.S. Citizen

Objectives:

- Identification. Identify which GSA Containers/Vault Doors are permitted to be repaired and put back into use.
- Limited Use. Learn the meaning of "Limited Use" and describe the procedures necessary to control access to GSA-approved security equipment.
- Neutralization. Hands-on Neutralization of the 4 approved opening methods.
- Repair. Perform the 4 approved repair methods.
- Overview of Federal Standard 809E

Certification:

GSA Certified Neutralization and Repair Technician

Is this certification right for you?

Become certified in just 3 days to neutralize and repair GSA Containers and Vault Doors.
