

## GSA Certified Safe & Vault: Inspector

The 3-day GSA Inspector course will cover how to check if the security integrity of a GSA approved container or vault door is intact, and if not, if it can be restored. This course enables government users and government contractors to replace missing GSA labels on security equipment.

### Who Should Attend:

Those who currently hold a GSA Certification and need to recertify as a GSA Inspector.

Please note: GSA Inspectors are permitted to renew their certification 6 months prior to, up to 90 days following their certification expiration date. Inspectors are permitted to renew their certification at any approved GSA school.

Pre-requisite: U.S. Citizen

### Objectives:

- Review recent changes to Federal Specifications and Regulations.
- Review of Federal Standard 809
- Review of the responsibility of a GSA Inspector
- Review GSA approved Manufacturers & Products
- Discuss Security Equipment Disposal guidelines
- Discuss the Inspection Report requirements and the accountability of using GSA labels
- Written and Practical exam
